

Press Release of the Ministry of Justice

Date: June 30, 2016

Release unit: The Ministry of Justice

Contact: Prosecutor Pei-Ling TSAI

Contact Phone no.: 21910189 ext. 2306

New criminal confiscation law will be implemented on July 1, 2016, prosecutors ready for fighting.

The confiscation of criminal law is about to start, so the criminal proceedings have no way out.

The new criminal law confiscation systems have enlarged both the range of applying for a declaration of forfeiture alone from defendant to the third-party, and the range of claim to illegal property as well as illegal funds which are transformed from criminal proceedings, hence, the new criminal law confiscation systems are also being called the "witty" amending of the law. Although only hundred of words involved in this amendment, each word can be worth a thousand gold, because it is estimated that the amount of illegal assets can be up to hundred billion dollars. The new criminal law confiscation systems can also be applicable to situations like defendant's death or fugitive wanted by the law. Other ideal candidates which also fall in the range of the new criminal law confiscation systems include transforming criminal proceedings into re-investment, buying luxury apartments, fancy cars, loose diamond or illegal funds transferring to children or registration under third-person.

Set up the "special unit for recovering the proceeds of crime," dirty money will be down to the last dollar.

The confiscation of criminal law is about to start, the Ministry of Justice has asked our sub prosecutorial offices to set up the "special unit for recovering the proceeds of crime", fortifying the application of new law especially in cases with great attention from society, such as the Wang Chuan-Pu case in which many countries have given us a hand in confiscating the proceeds of crime, which the total amount is nearly up to US \$ 900 million dollars and the new criminal law confiscation systems will be applied by Special Investigation Unit in the Supreme Prosecutor Office and apply for a declaration of forfeiture alone.

In addition, cases with high social- detrimental nature hated bitterly by the mass such as controlled substance cases, illegal fund-raising and fraudulent cases as well as food safety- detrimental cases should also be

applicable to the new law of estimating illegal proceeds, avoiding any kind of illegal profit and curbing the occurrence of crime.

Establish a " specialized area for seizure and appraisal at current rate ", people can buy at a nice bargain online.

To facilitate the implementation of the new system with illegal seizure of assets increasing, the " specialized area for seizure and appraisal at current rate website" will be established by the Ministry of Justice global information web on July 1,2016 at the same time, offering a platform for people to inquire all the items being ready for appraising at current rate. Items like Birkin bag, fancy cars or 3C products which interest students the most are all among popular list.

Not only can we compensate the victim preferentially after the hearing of the case, but can also cut down the expense if distress are appraised at current rate in initial stage of investigation. The system of appraising at current rate creates tripartite effectiveness for the country, the victim and the defendant. After the enforcement of the new confiscation of criminal law on July 1,2016, people can check out the dates and items of appraising at current rate by each prosecutor' offices through clicking on the Ministry of Justice global information website. We honestly welcome the mass to make use of it.
